# POWERSET NFC PROGRAMMER

The PowerSet NFC Programmer provides a read and write solution for configuring and managing compatible luminaires without the need for additional devices or physical access.

Designed for ease of use in the field, it enables installers and maintenance teams to read and write luminaire settings instantly via NFC, streamlining commissioning and ongoing adjustments.

## SPECIFICATION

- ✓ Programmer reads the below luminaire configurations from QR code on lantern's exterior
  - Power / lumen output
  - CLO / non-CLO
  - DALI configuration
  - Part-night dimming profiles
- ✓ Durable, weatherproof remote control for outdoor use
- ✓ No need to open luminaires during programming
- ✓ Operates without laptops, smartphones, or tablets
